

Staff Report

TO: Honorable Mayor and Members of the City Council
FROM: Thaxton Van Belle, Director of Water Reclamation
BY: Kenyon Potter, Principal Engineer
DATE: July 21, 2026
SUBJECT: Award of PSA for Wastewater Master Plan Update (CIP WW26-05)

Description: Award a Professional Services Agreement to Webb Associates for the Wastewater Master Plan Update (CIP WW26-05).

Motion:

If the City Council determines that staff's recommendation is appropriate, the following motion is provided:

I move to approve the award of a Professional Services Agreement to Albert A. Webb Associates not to exceed \$263,780 for an initial one-year term to complete the WWMP Update, with two optional one-year extensions for continued support per BMC 302.070 and to approve a ten percent (10%) contingency of \$26,378 for contract amendments and authorize the City Manager to approve amendments up to \$26,378 for a total budget of \$290,158

Recommendation:

Staff recommends that the City Council award a Professional Services Agreement to Albert A. Webb Associates, in an amount not to exceed \$263,780 for a one-year term, to complete the update of the City's Wastewater Master Plan, with two optional one-year extensions for continued support. A 10 percent contingency of \$26,378 is also recommended to accommodate potential amendments, bringing the total authorized budget to \$290,158. Updating the master plan is necessary due to significant growth, the need to modernize hydraulic modeling software, planned new lift stations and sewer mains, and corrections to earlier system data. The recommended consultant was selected as the most qualified through a competitive proposal and interview process.

Discussion:

In 2019, the City embarked on the development of the City's first Wastewater Master Plan (WWMP). A WWMP serves as a long-term roadmap to ensure reliable, efficient, and cost-effective wastewater services. It identifies current system challenges, forecasts future demand, and guides capital improvement projects, regulatory compliance, and operational strategies. The plan helps optimize treatment plant performance, expand infrastructure, and implement sustainable solutions. On August 16, 2019, the City issued an RFP for development of the master plan, including condition assessment of the existing lift stations, and on November 19, 2019, the City awarded a consultant contract to perform the work. In August 2021, the city held a workshop on the draft Wastewater Master Plan to receive public comments. On February 1, 2022, the City Council approved the Wastewater Master Plan.

It has been five years since the initial Wastewater Master Plan (WWMP) was completed, during which the City has continued to experience steady growth. The hydraulic modeling software, InfoSWMM, implemented in the last WWMP is no longer supported and the scope of the WWMP update includes the conversion of the existing model to a supported platform. While localized area studies have been performed on a project-by-project basis, the WWMP itself has not been updated. In addition, recent and proposed developments include up to five new sewer lift stations and several miles of new gravity sewer mains. Finally, some of the as-builts and historical documents employed in the initial WWMP were later found to contain errors. These findings and the current and projected growth levels necessitate a comprehensive update to the WWMP.

On May 1, 2026, the City issued an RFP for an update to the Wastewater Master Plan. On or before June 2, 2026, the City received four (4) responsive bids for the Project as summarized below:

1. Akel Engineering Group
2. Albert A. Webb Associates
3. Dudek
4. Engineering Resources of Southern California

On June 22, 2026, City staff conducted interviews with each of the firms and selected Albert A. Webb Associates as the most qualified firm. Thereafter, City staff negotiated a fee with the selected firm.

Fiscal Impact:

The estimated cost of preparing this staff report is \$300.00.

The cost for the Project will be paid from CIP WW26-05. The following table is a summary of the Project budget:

Alternatives:

The City Council may choose not to authorize the contract and provide an alternative direction to staff
